Experience

Senior Software Engineer

Verizon Media

Feb 2020 - Present

Software Development Engineer in Test

Verizon Media

Jun 2016 - Feb 2020 (3 years 9 months)
• Develop and contribute to new and existing automated testing frameworks and tools primarily in the C# language.
• As a mentor for testing, I provide feedback to teams on testing best practices through demos and code reviews.
• I actively participate in daily deployments by analyzing automated test results, monitoring logs in all environments, tracking feature changes, as well as assisting developers on testing.
• I help to contribute to the overall success of the team and code base by assisting with bug fixes and or feature improvements, participate in code reviews, adding additional unit tests or integration tests, assisting with debugging incidents, helping the team with estimating proper story points to include testing efforts, voicing concerns with any possible new features or code changes.

Recent projects:
• Developed an API automation framework for our SSL Microservice and coached the team on test writing best practices through documentation, demos and code reviews. With the teams help, we increased our automated tests by 59% in 30 days.
• Reduced tedious manual testing efforts and increased our deploy confidence through the addition of high value End-to-End tests.
• Implemented a consecutive failure count feature in the teams regression reporting dashboard to identify problematic consecutive failing tests across multiple builds.

Test Engineer

LinkedIn

May 2015 - Apr 2016 (1 year)
• Created, maintained, and analyzed automated tests using Ranorex, Selenium and Javascript solutions.
• Subject-matter expert in Lynda Enterprise product functionality.
• Test Lead for all high priority issues impacting enterprise admins and users.
• Participated in audits and reviews of testing, highlighting areas for improvement and coverage.
• Worked with software developers on improving quality and craftsmanship of code.

Associate QA Engineer

Lynda.com

May 2014 - May 2015 (1 year 1 month)
• Owned multiple features and serviced certifications from planning to execution.
• Described defect symptoms clearly, logged/tracked detailed bug reports, and communicated issues for proper escalation and resolution.
• Developed, coordinated, updated, and executed manual and automated tests cases.
• Interpreted, and reported test automation results.
• Participated in product reviews, planning, and bug triage meetings.
• Worked closely with product owners, developers, designers and QA to ensure delivery of features and bug fixes that exceeded expectations.

Education

UCLA Extension
Professional Certificate, Applications Programming
Eight courses(32 units) in the following topics: Java, .Net, Javascript, Html/CSS, SQL, and mobile development

College of the Canyons
General Education/Computer Networking

UCLA Extension
Certificate, Java Programming

Licenses & Certifications

Microsoft Technology Associate: Software Testing Fundamentals - Microsoft
F682-6449

Skills

Automated Software Testing • Quality Assurance • Web Development • Web Applications • Agile Methodologies • Full-Stack Development • JavaScript • C# • SQL • Security
